

How to Use Your Mini Beast Wheel

You will need both parts of the Wheel (Bottom & Top)

1. Print these out on card or paper
2. Cut out both parts (on the top layer you will also need to cut out the white sections indicated)
3. Laminate them so they can be used outside in all weather
4. Layer them together and pierce a hole through the middle
5. Add a paper fastener or similar to connect them
6. Turn the top layer so the handle of magnifying glass points to the mini beast seen, the name will appear in one of the cut out windows and the habitat in another
